WIRELESS - MULTIPOINT CALLING SYSTEM

This is smart multipoint wireless calling system.

This is an efficient way to manage with great accuracy and less manpower. This is the most versatile system, do not need any type of wiring or installation procedure, just PLUG - N - PLAY.

MAIN CONTROL PANEL

This is expandable and addressable receiving panel. It can receive in multiple of 9 transmitted callers signals, (one panel contains 9X5=45) Callers addresses. The control panel is cascadable, it can be expanded.

Each reception is identified individually and indicated on panel with AUDIO - VISUAL indication.

INDIVIDUAL RESET is provided on main control panel itself.

Panel is powered by 230V A.C. With BATTERY back-up.

WIRELESS CALL POINT

This can be in form of stationary wall mounted or table top portable call bell type or wearable pendent remote type (specifically for patients).

HOW IT WORKS

If a caller remote point needs any help or assistance. He can intimate It by the touch of finger. The remote transmitter sends a coded signal to main control panel carrying the information of location of caller. The main control panel receives that signal and decodes the received information. This gives beep sound on arrival of call and display the location with LED indication. The attendant can read the location and reset it manually before providing service to the calling person.

Receiving range from call point to main control panel is 100Mtrs.* At the line of sight. IT CAN BE EXTEND TO ANY LIMIT WITH THE

APPLICATIONS

CORPORATE OFFICES

POLYCLINICS AND HOSPITALS

MULTISTORY BUILDINGS AND APARTMENTS

BUNGALOWS AND VILLAS

INDOOR / GARDEN RESTAURANTS

AND MANY OTHER APPLICATIONS.
